Free Love & Logic Event Is January 30

Love & Logic is a philosophy of raising and teaching children allowing adults to be happier, empowered, and more skilled in the interactions with children. Love allows children to grow through their mistakes. Logic allows children to live with the consequences of their choices. Love & Logic is a way of working with children that puts parents and teachers back in control. Love & Logic teaches children to be responsible, and prepares young people to live in the real world with its many choices and consequences.

Dr. Charles Fay is a parent, author and consultant to schools, parent groups and mental health professional around the world. His expertise in developing and teaching practical discipline strategies has been refined through work with severely disturbed youth in school, hospital and community settings.
